

New Jersey Devils The Prudential Center Newark, New Jersey

Projects: Sound System, Broadcast Cabling, SMATV System, Replay Control Room, Interactive Suites, and much, much more...

Contract: \$ 11,000,000.00

Now residing in Newark, NJ, the New Jersey Devils are settling into their new home at The Prudential Center. Diversified Systems scored the "ultimate" hat trick by getting 5 major systems up and running for opening day under an extremely aggressive timeframe.

Diversified Systems was hired to design and install multiple systems throughout "The Rock," including the Sound System, Broadcast Cabling, SMATV System, Video Replay Control Room, Interactive Suites, and various other Broadcast and AV elements throughout the arena.

The three most intricate systems, Sound, Broadcast, and SMATV cabling, have thousands of connection points throughout the entire Arena all originating from central hubs.

While these projects progressed, we were additionally hired to design and build the Video Replay room that feeds the center hung board and an interactive system for the 76 Luxury Suites. Each suite has touch screen computers that allows a guest to order food, surf the web, check game stats, and view replays.

Other small projects include the Devils locker room Sound System, Goal Bar displays, and a Transit Information system for guests to view up to date public transportation information.

Special Points of Interest

- *If you add all of the Fiber, Video, Audio cables end to end it would run a distance of 1,787,233 feet.*
- *Each of the 4 speaker clusters have an overall height of about 15 feet and weigh approximately 6 tons.*
